Ease the burden of quality performance with PerformancePathway

PerformancePathway™

Submitting for quality measures can be a difficult, time-consuming task. That's why you need to think about getting ahead of the 2025 CMS requirements now. MRO lifts the burden of quality performance so you can focus on your mission.
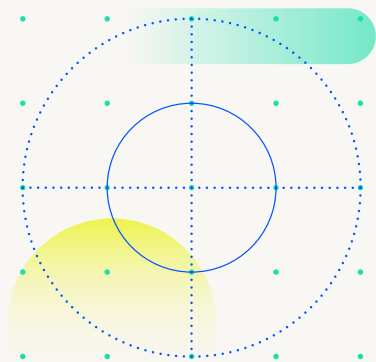

As your expert partner, we tailor our end-to-end reporting technology and services around your specific needs, guiding you through the entire process. We help you discover ways to visualize gaps in quality performance across the enterprise, share information, enhance clinician relationships, and in turn, provide insights to drive better patient outcomes.

Normalize multiple data sources into a single quality submission

With PerformancePathway, you can normalize data from disparate sources and submit easily for any internal or external quality performance program.

PerformancePathway is an EHR-agnostic cloud-based SaaS that ingests and standardizes data, including unstructured and discrete, from multiple clinical sources — including more than 200 EHRs and practice management systems. We are the experts in quality payment programs for multiple ACOs — we even had one of the few successful submissions for the APP quality performance category for 2021.
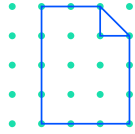

Our Capabilities

- Qualified Clinical Data Registry

- EHR-agnostic data standardization

- Keyword mapping to supplemental data when value codes are missing

- HITRUST, HIPAA, HITECH compliant

- Onboarding of practices from first touch to data validation
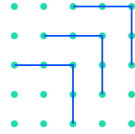

- Support for all CMS measures

We are your expert partner

Understanding healthcare's ever-changing requirements is our business. MRO lightens your quality performance load.
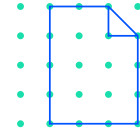

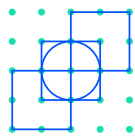

Our cloud-based SaaS experience:
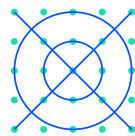

12,000+ Data Elements Supported

**22,500+ Practices Across Registries**

1.3B+ Clinical Records Extracted

200,000+ Network of Connected Providers

121M+ Unique Patient Records Processed

3.2T+ Data Elements Extracted

With PerfomancePathway, you can:

- Optimize value-based care
- Normalize disparate data sources
- Manage and share information easily
- Glean actionable insights
- Prioritize compliance, security, and privacy

- Secure buy-in throughout the organization
- Collaborate across levels and silos
- Strengthen practice and provider relationships

Gain actionable insights to improve quality performance

PerformancePathway helps you slice and dice data and share information easily throughout your organization. Our team onboards and works with provider practices for you, enabling them to manage quality and improving your relationships over time.

The massive amount of data in EHRs holds countless lessons about quality performance. We'll help you find them by simplifying extraction, validation, and reporting to uncover insights that you can turn into action across the care continuum.

MRO is committed to your success

MRO is the leading provider of cloud-based technology and services. We empower healthcare organizations to aggregate and perform analytics on clinical data, so they can focus on improving patient care while reducing costs.

Over 200,000 providers across the U.S. use our technology and services to improve healthcare quality performance. Discover how PerformancePathway can improve your quality performance.
